

WRITING ASSESSMENT

Write your final composition here.

I agree because if the students would come to class at 9:30am they would be ready for the class. Everyone will be ready to learn and nobody would sleep in the class. Everyone would be happy with that decision because you wouldn't have to wake up six o'clock in the morning to go to school. If that decision would be made everyone would be happy to come to school.

If the school would end at four thirty wouldn't be a big problem for students some of them would have to change their schedule for work, but I don't think it would be a big problem for anyone. Some students wouldn't be happy with that decision but most of them would. Even the test scores would be higher in the school more would be telling my classes in the school. I think more students would start to like school and they would be happier. I think that it would be a good idea if that decision would be made more students would start to like school and they would be happy to attend their classes. This is why I agree with this decision.

Score Point: 2

This response is considered flawed. A low degree of proficiency in persuasive writing skills is reflected. The writer states a clear position in favor of changing the school schedule. However, there is very little development of the writer's key ideas (students would be ready to learn, students would be happier, and test scores would be higher) and very little organization of these ideas. The syntax is repetitive and the details are listy. Errors in writing conventions sometime interfere with communication.
